

## Evaluation of Data Retrieval from TRR170-DB

---

We are continuously evaluating whether data retrieval from the TRR170-DB meets users' needs. Feedbacks from data users help us to improve TRR170-DB facilities to find and use data produced by the TRR170 '*Late accretion onto terrestrial planets*'.

Please leave a comment on following topics and email the form to [trr170-office@geo.fu-berlin.de](mailto:trr170-office@geo.fu-berlin.de).

Thank you very much. The TRR170-DB Team

Our **Web Portal** is the single point entry for discover data and products available in the TRR170-DB. The Web Portal also serves as a news board to inform about the latest events or news regarding the TRR170-DB as well as providing a help desk facility. Do you have any comments that help us to improve the offered services.

**Finding and using** data via the backend of the TRR170-DB. The database contains a centralized catalogue describing data and products, various databases, journal articles, and user-related information. The content is browsable and searchable. Please leave your comments on following topics regarding easiness to handle and quality of obtained results:

- Browsing TRR170-DB
- Sorting and viewing search results
- Redefining search criteria via choosing selected metadata fields
- Viewing TRR170-DB and datasets
- Viewing files
- Citing data
- Downloading files, in particular tabular data
- Downloading via URL
- Terms and conditions and licenses attached to datasets
- Information provided on available datasets

Feel free to leave any **other comments** here.
